Important announcement regarding QPharma management during the COVID-19 pandemic outbreak

Dear valued customer,

In light of the recent developments in the spread of the COVID-19 virus, we have taken some additional measures to ensure reliable supply of products and services.

Production planning includes measures to ensure sufficient stocks of raw materials, API and packaging materials to continue manufacturing during a potentially longer period with disruption of supply.

Additional specific training of personnel in hygiene, gowning, and work interactions will take place to mitigate the risk of virus spread inside the company. All in alignment with current recommendations from national health authorities.

As one of your key partners in Development and Manufacturing services, we are conscious about our responsibilities and QPharma is doing our outmost to guarantee product safety and quality, customer satisfaction as well as the health of our employees.

Thank you for your understanding and cooperation.

Kenneth Stokholm
Managing Director
QPharma AB
